
Authorize 90 days to make the next treasury decision

Federated coordination · local-stabilization fallback · no production or funding authorization

ACG has enough evidence to choose a direction—not enough to approve value or production

The first commitment is ownership and controlled evidence

58.18%

same-day proxy visibility ·
5,792 / 9,955 account-days

6.30%

payment exceptions · 479 / 7,600 supplied
records

87

federated option score · vs 72 local / 60 global

\$0

recognized value today · cash, P&L, capacity

Four linked failures explain ACG's treasury problem

The recommendation must fix ownership, evidence, control, and service together

Failure	Evidence	Management implication
Visibility	58.18%; 2,534 $\geq 2d$	Own source, cutoff, reconciliation, exception
Liquidity	\$21m/\$35m/\$46.2m	Certify mobility, buffers, economics before action
Payment operation	31.51% manual touch; 6.30% exceptions	Prove causes; standardize safely
Operating model	Local practices; three ERPs; no enterprise TMS	Federated policy/data/control spine with local rights

READOUT

Visibility: 58.18%;
2,534 $\geq 2d$
Liquidity:
\$21m/\$35m/\$46.2m

Portal and spreadsheet sources explain every delayed account-day in the supplied pattern

Automated sources are same-day under the proxy; manual sources are not

READOUT

23 manual sources ·
58.18% proxy ·
calendar-date only

The liquidity analysis defines a certification agenda—not a cash-release claim

14-day screen pass rates fall from 100% to 0% as the threshold rises

VG05 open

Payment friction is material enough to diagnose—and too weakly evidenced to automate broadly

Within the supplied 7,600-record extract

31.51%

manual-touch rate · 2,395 records

6.30%

exception rate · 479 records

5.00%

late-release rate · 380 records

10.34%

cross-border · 786 records

The root causes sit upstream of the visible symptoms

Each root cause requires an owner and an observable control

Ownership is split

01

Data · mobility · value

Data is incomplete

02

Lineage · timestamps · populations

Process & service

Variable intake, cutoffs, repair loops and emergency practice.

Control & technology

Access · SoD · audit · resilience tests

Do not automate an undefined process or centralize an uncertified decision right.

Eight design principles resolve the tension between enterprise control and local responsiveness

Critical gates remain non-compensating

Enterprise spine

Daily evidence · global ownership · common policy · controlled metrics

Local rights

Certified context · local rights · visible exceptions

Control by design

SoD · access · audit · reconciliation · service · resilience · rollback

Staged and reversible

Existing ERPs · bounded cohorts · gates · rollback · local fallback

Any failed critical gate blocks the affected decision; value cannot compensate.

Federated coordination offers the best balance with a local fallback

Weighted option score / 100; scores select direction, not execution readiness

READOUT

5/5 sensitivity wins · 0
gates closed · switch on
failure

The target model centralizes standards and evidence— not every operational decision

One enterprise spine with governed regional and local execution

Global spine

- Treasury: policy, data, position and mobility standards
- CIO: integration, access, audit, cyber and resilience
- Finance: cost/benefit admission and change control

Regional and local rights

- Regions/BU: context, requests, critical service and emergencies
- Shared Services: payment execution and exceptions

Internal Audit remains independent; Legal/Tax owns specialist conclusions; every production pilot requires a separate go/no-go.

Seven initiatives start with data, governance, and value control—not platform procurement

Priority score combines value 30%, risk 25%, feasibility 20%, dependency 15%, speed 10%

Rank	Initiative	Score	Accountable owner	First exit
1	Cash data & visibility	94	Group Treasurer	G1 metric/population contract
2	Benefits, cost & KPI assurance	92	CFO / Finance Benefits	G2 cost evidence
3	Governance, service & adoption	86	CFO / Treasurer	G1 RACI and rights
4	Payment controls & exceptions	85	Shared Services	Day 75 cause readout
5	Liquidity certification	83	Group Treasurer	G2 certification design
6	Integration, access & resilience	80	CIO	G3 rollback pass
7	Account rationalization	63	Group Treasurer	Per-account G2 decision

READOUT

1: Cash data & visibility
2: Benefits, cost & KPI assurance

The business case stays credible by keeping unlike value types separate

Current validated, funded, and recognized value remains zero

Value type	Diagnostic quantity	Recognized	Admission gate
Cash release	\$21m / \$35m / \$46.2m screens	\$0	VG01–VG05
Annual P&L	\$3,900 / \$7,800 / \$7,800 fee sensitivity	\$0	VG06–VG07
Productive capacity	50 / 150 / 150 hours/month	\$0	VG08–VG10
Risk reduction	Exposure and value not quantified	\$0 ledger entry	VG11–VG12

READOUT

Cash release: \$21m / \$35m / \$46.2m screens
Annual P&L: \$3,900 / \$7,800 / \$7,800 fee sensitivity

Use 90 days to earn a bounded test before scaling

Day 90 is a decision gate—not a launch date

0–30D	Own the facts	Lock populations, sources, owners and baselines.
31–60D	Prove conditions	Close local, control, architecture and cost gaps.
61–90D	Make ready	Prepare cohort gates, controls, rollback and freeze path.
M4–6	Wave 1	Separate approvals; bounded visibility and safe change.
M7–12	Wave 2	Scale only where cash and payment evidence holds.

Governance converts the roadmap into stop, switch, and scale decisions

Critical risk cannot be averaged away

Risk / trigger	Preventive control	Decision owner	Response
Unowned metric	G1 contract	CFO / Treasurer / CIO	Narrow, extend with owner/date, or switch
Uncertified cash	VG01–VG05; \$0 eligible	Treasurer / Finance	No action; keep value at \$0
Service / control / rollback failure	Blackout, emergency rights, tests	BU Finance / CIO / Control	Stop and rollback
Cost > \$1.5m or run budget absent	CR01–CR10; separate budgets	CFO / SteerCo	Stage, redesign, or switch
Value formula or population drift	Finance dictionary/change control	Finance Benefits	Suspend, restate, review

DECISION

Unowned metric: G1 contract
Uncertified cash: VG01–VG05; \$0 eligible

Approve the direction and owners; return at Day 90

Five Steering Committee commitments activate the mobilization

DAY 0	Confirm direction	CFO/SteerCo · signed fallback and boundary
DAY 30	Accept owners	Executives · RACI and source/metric contracts
DAY 30	Lock NA calendar	Rachel Kim/CFO · freeze dates and sign-off path
DAY 60	Prove affordability	Finance/CIO/Procurement · CR01–CR10 pack
DAY 90	Take G3 decision	CFO/SteerCo · stop, extend or bounded pilot

Appendix — Definitions, data quality, and methods bound every metric

Analysis	Method / definition	Data quality	Boundary
Visibility	Same-date days ÷ expected days	9,955 rows; all delays use Portal/Spreadsheet	Proxy—not start-of-day/24h
Liquidity	14-day minimum regional net	168 windows; no mobility fields	Screen—not movable cash
Payments	Flags ÷ 7,600 records	Extract; no certified denominator	Association—not cause
Accounts	Dormant + legacy + zero payments	55 accounts; local links untested	Candidate—not closure
Capacity	Frequency × time × manual %	Management estimates; repairs unreconciled	Hours—not headcount/P&L

READOUT

Visibility: Same-date days ÷ expected days
Liquidity: 14-day minimum regional net

Appendix — Detailed analyses, sensitivities, and rejected alternatives support the choice

Analysis	Base result	Sensitivity / rejected alternative	Decision implication
Operating model	Federated 87 vs local 72 vs global 60	Wins 5/5 weights; reject global-now/local-only	Federated now; local fallback
Liquidity	\$35m base screen passes 138/168 windows	\$21m: 168/168; \$46.2m: 0/168	Certify before action
Accounts	4 candidates; \$7,800/year estimated fees	2 / 4 / 4 candidates across diagnostic cases	Validate one by one; no bulk closure
Capacity	150 productive hours/month hypothesis	50 / 150 / 150 h/month; 617.72 total estimate	Hours are not headcount/P&L
Affordability	\$1.155m one-time + \$281k/year recurring base	\$755k / \$1.155m / \$1.715m; high + \$215k	Source at G2; stage/redesign/switch
